How to reset a clicker brand garage door opener

Resetting a garage clicker through the keypad is often necessary, but tricky without a code. Luckily, it is possible with a few simple steps that involve clearing the memory on your keypad. Follow along as we explore how to reset your garage clicker without the code. Over the years, technology has consistently advanced and made life more convenient in many ways. One such technological advancement is the Clicker universal wireless garage door entry system. With this keyless entry device, you and your family can have convenient, secure access to your home and garage. To reset your clicker garage door keypad without a code, you first need to locate the learn knob and then hold it down until all of the lights turn off. This will erase your password and allow your system to function without the use of a code, or a password. However, there may come a time where you've forgotten your code, need to change it, or simply moved into a new home and do not know the code. If either of these circumstances describes your current situation, you've come to the right place! Do You Need Garage Door Opener Installation or Replacement? How To Reset Clicker Garage Door Keypad Without Code? Whether you've forgotten the code, or never knew it in the first place, you can reset it by following a few simple steps. In short, you need to locate the LEARN button to wipe the memory and proceed with reprogramming a new four-digit PIN (Personal Identification Number). Follow these steps to successfully reset your Clicker garage door keypad without a code. Step 1: Clear Obstructions Before you proceed any further, make sure that your garage door area is clear of any obstructions. Bring the kids and pets inside to avoid any potential dangers that could arise from testing the opening and closing of the garage door. Once the area is free of obstacles, continue on to locating the LEARN button. Step 2: Locate The LEARN Button If you need to reprogram your Clicker keypad but do not know the code, you must locate the LEARN button. It can be found on either the door control or on the garage door opener. The LEARN button on your garage door opener is located just above the antenna wire that hangs from the motorhead. Or, it may be found under a light cover. The button will either be red/orange, purple, green, or yellow, depending on your particular opener. You will need to use a ladder to gain access to the LEARN button, as the motor is generally placed on the ceiling of your garage. Step 3: Clear The Opener Memory The LEARN button on your garage door opener has essentially two functions: Program accessories to the opener. Clear the memory of the opener – this will erase all of the accessories that are currently programmed to the opener. If your garage door opener is Wi-Fi enabled it will have a third function that activates Wi-Fi learn mode. However, to reset your Clicker garage door keypad we are only concerned with clearing the memory. When you've located the LEARN button on your opener, press and hold it down. This will cause the LED to turn on, and after six seconds the light will turn off. Once it's off, this indicates that you have successfully cleared out the keypad and any handheld remotes. The system will now have no passcode and must be reprogrammed. Step 4: Program Clicker Garage Door Keypad With the memory of your opener successfully wiped, all that's left is to reprogram the Clicker keypad. At this point, you are essentially programming the device as if it was brand new. Follow these steps to program your Clicker garage door keypad: Press down on the LEARN button on your garage door opener once more. Release the button and this should trigger the LED light. With the LED light lit, you will have 30 seconds to complete the following step. On your keypad, insert the four-digit PIN of your choice. Then, press and hold down on the ENTER button until the light blinks on the garage door opener. Your Clicker garage door keypad has now been successfully reset and your garage can be accessed by your personal four-digit code. To ensure the safety and security of your home, be sure that the code you enter is one that cannot be easily guessed by potential thieves. How To Set Temporary Pin During the holiday season, families are frequently coming and going from their homes. For those who travel out of town for the holidays, it can be very beneficial to know how to set a temporary PIN for your Clicker garage door keypad. Having a temporary PIN in place can add convenience and safety, should you need someone to check on your pets or water your plants while you're away. You can set a temporary PIN in one of two ways: by how many hours you want the temporary PIN to work, or how many times you can open the garage door with the temporary PIN. Program How Many Hours The Temporary PIN Will Work Key in your programmed four-digit PIN. Press and hold the * key until the light on the garage door opener blinks three times. Enter your desired temporary four-digit PIN. Make sure that it is different from the one you previously entered. Then, press the ENTER button. This will cause the garage door opener lights to blink four times. At this point, type in the number of hours you want the temporary PIN to work for (you can key in a number up to 255 hours). Press the * button to lock in your entry. The garage door opener will blink one time, indicating the temporary PIN is ready for use. Program How Many Times To Open Garage Door With Temporary PIN Key in your personal four-digit PIN you set previously. Press and hold the * key until the light on the garage door opener blinks three times. Enter your desired temporary four-digit PIN. Make sure that it is different than the one you previously keyed in. Then, press the ENTER button. This will cause the garage door opener lights to blink four times. At this point, type in the number of times you want the temporary pin to work for (allows for up to 255 openings). Press the # button to lock in your entry. The garage door opener will blink one time, indicating the temporary PIN is ready for use. What Is A Clicker Garage Door Keypad? Clicker garage door keypads are the ultimate solution for keyless entry and exit from your garage or gate. Mass-produced by Chamberlain, the largest and most dependable garage door opener manufacturer in North America, the Clicker system is compatible with over 90% of all garage door openers in the country. The keypad can be installed and set up in minutes and is easy to program with its universal frequency recognition. Once mounted, your Clicker garage door keypad will give you convenient access into your garage and home by simply typing in your personal four-digit code. Installing a Clicker universal wireless entry system is ideal for replacing non-operational keyless entry units or as an add-on to your current garage door opening system. It is placed on the side of your garage door opening and is entirely wireless, eliminating the need for any electrical connections. Why Do People Choose The Clicker Garage Door Keypad? Clicker garage door keypads can make your life more convenient by eliminating the need to access your home with a key. As long as you have the code, your garage door is opened upon typing it in, allowing you to enter your home with ease. Installing a clicker garage door opening system also comes with the following advantages: Universal functionality. The Clicker garage door keypad's universal frequency recognition works with over 90% of all garage door openers in North American, including major brands like LiftMaster, Genie, Chamberlain, Craftsman, and so much more. Proven quality. The unit's sliding cover has been placed through rigorous quality testing standards and passed. It is proven to protect the keypad itself in all weather conditions. Illuminated keypad. The backlit feature on the keypad offers visibility in any lighting situation, allowing you to gain access by keying in your personal four-digit code. Perfect for active lifestyles. Going out for a jog or walk? The clicker garage door keypad eliminates the need for a handheld remote, gives you convenient walk-in access to your home, and doesn't require you to carry a key or remote during your outdoor activities. Trusted safety and security. The Clicker keypad's security technology is unmatched and offers extremely secure encryption to prevent hacking. Easy setup. The keypad's easy-to-follow wireless programming procedure is quick and can be done in seconds. It is also easily installed on the side of your garage door opening and does not require any electrical connections. With a Clicker garage door keypad, you never have to worry about being locked out of your home. This fact is especially beneficial for families with older children, as they can arrive home and gain easy access to the home by typing in the four-digit code. You'll also never need to carry a remote or key, eradicating any worries about losing these devices. Do You Need Garage Door Opener Installation or Replacement? Related Questions Why won't my garage door keypad work? There are a number of reasons why your garage door keypad may not be working. First, you should check if the batteries have died. Then, inspect for frayed wires inside, or broken or stuck buttons on the keypad itself. In some cases, you may need to replace the entire system, especially if it's old. Why is my garage door auto-reversing? If your garage door auto reverses when you're trying to close it, this is likely caused by something blocking the photo-eye. These eyes exist at ground level on either side of the door. If something is blocking them, they're covered in grime or knocked out of place, your garage door will not close. Inspect your photo eyes, clean and realign them as needed.
